Welcome to our practice!

We provide full-spectrum family medical care, all of the traditional excellence in care you have a right to expect from us. We have also opened our eyes and our minds to "think outside of the box" and continue to study alternative and complementary means to diagnosis and treatment of a large variety of problems. Since most insurance companies don't provide coverage for those services, we tend to use traditional means initially. If you request otherwise or we've come to a dead-end in helping you with these methods, there are a variety of safe and highly effective diagnostic and therapeutic modalities that we can provide. We also do a lot of work with those recovering from substance abuse and have specialized training and experience in those areas.

Please feel free to browse our website and the articles in the on-line library to learn more about us, if you like what you see, call and schedule an appointment; we'd love to meet and help you! Services we offer including (but not limited to)

Chelation Therapy Study

Are you over 50?

Have you ever had a heart attack or coronary intervention such as angioplasty?

If you answered "yes" to these questions, you may be eligible to participate in a national study sponsored by the National Institute of Health on Chelation Therapy. Our practice is one of 100 sites chosen by the NIH to participate in the Trial to Assess Chelation Therapy (TACT) trial. Patients receive 40 treatments and oral vitamin supplements at no cost. This is a double-blind trial, half of the patients will get placebo IV, the other half will get the active drug. Visit www.nccam.nih.gov/chelation to learn more or ask at our front desk.

Mesotherapy

This is a true fat-melting therapy; local injections of fat-solvents can reduce cellulite and other localized fat collections

Autism Treatments

We provide the protocol that is reviewed at <u>www.autism.org</u> to reverse autism. DAN Protocol therapies are provided to remove toxins that are strongly associated with Autism.

Intra-Venous, Injection and Transdermal Therapies Available:

- ❖ Anti-Viral Therapies
- ❖ Asthma Therapies
- ❖ Anti-Arrhythmia Therapies
- ❖ Bio-Identical Hormone Replacement
