Acudetox for the treatment of addiction. This form of acupuncture involves 5 points in each outer ear that unblock the meridians involving the Shen Men or “Spirit Gate”, Sympathetic, Kidney, Liver & Lung providing for improved movement of Chi (Qi), the “life force” that acupuncture is based upon. It doubles the rate of long-term attainment and maintenance of sobriety/being clean from drugs of abuse as it improves pathways of emotional healing within the brain that are tied to the issues related to addiction.

Addiction Resource, raises awareness on the dangers of addiction and helps local communities stay drug-free (<https://addictionresource.com/>) and the **American Society of Addiction Medicine**, who also promotes drug abuse prevention and treatment.

Alpha-Stim for Pain & Anxiety Therapy

This device provided significant improvement of 93% in 1,949 pain patients who used Alpha-Stim for a minimum of three weeks. Most of these people failed to get results from previous therapies or they would never have acquired an Alpha-Stim in the first place. The Alpha-Stim is also a lot more cost effective than almost any other treatment for pain and stress-related disorders. Once the device is purchased it costs very little to use. Most drugs cost more than an Alpha-Stim after just a few months. It eases the brain into a relaxing brain-wave pattern that removes anxiety and greatly reduces pain.

American Academy of Anti-Aging Medicine This is the site that will help you keep from feeling old. Plenty of information on bioidentical hormone replacement and other ways to maintain the vigor of youth. HGH works! Insurance doesn't cover that or detoxification protocols with EDTA chelation etc. Bio-Identical Hormone Replacement Therapy for Men & Women, thyroid supplementation, mesotherapy all have a positive impact on aging. This site will help let you know what is available. We offer most of these modalities.

American Academy of Family Physicians A great site with an awesome search engine to learn more about what you want to know.

[American College for the Advancement of Medicine](#) This is a premier site for complementary and alternative medicine. There is a wealth of information concerning chelation to remove heavy metals and other detoxification protocols.

[Better Health USA](#) This is a link that is associated with ImmunoLabs and their Allergy & Food Sensitivity testing, but there's a WEALTH of information at this site that I highly recommend!

[Defeat Autism Now](#) This is a link to the official site of the DAN protocol used to treat autism spectrum disorders

[Family Doctor Information](#) A great source of handouts for patient education to give you a brief overview of what you need to know on a large variety of subjects. Information available in English & en espanol

[Genova Diagnostic Labs](#) Genova Diagnostics, formerly Great Smokies Diagnostic Labs offers cutting edge testing for a variety of conditions. Endocrinology, Gastroenterology, Immunology, Metabolic & Nutritional Testing. This lab offers testing not done by any of the "standard" medical reference labs, it's the definitive source for Complementary & Alternative Medical Lab testing.

[ImmunoLab Food Sensitivity Testing](#) Everybody has heard of IgE Food Allergies that can cause anaphylaxis and death. There are a variety of foods that can trigger an IgG-mediated reaction that takes up to 5 days to show up. These can cause all types of chronic inflammatory and other problems but be virtually impossible to figure out with an "elimination diet". Migraines, Asthma, abdominal, skin, respiratory and many other organ systems/complaints can ensue. This lab will identify the source of dietary problems. Frequently those suffering will mention that these are foods that are frequently eaten, once removed or reduced in the diet symptoms tend to resolve rapidly.

[International Society of Environmentally Acquired Illness](#) This is the group that is involved with Chronic Inflammatory Response Syndrome (CIRS), ElectroMagnetic Field Sensitivity, Mast Cell Activation Syndrome (MCAS, Multiple Chemical Sensitivity and other poorly understood illnesses. This is the bleeding edge group.
